

# CoreVexa WP Repo: Architecture + GPT Connector

A PDF cannot auto-connect to a GPT session. This file embeds a clickable link and a QR code that open the GPT. Replace the URL with your private GPT link if needed.

## System Architecture

## CI/CD Pipeline

- Composer install
- WP-CLI db/migrate
- Artifact zip
- Rsync or SSH deploy
- Health check

## Connect to CoreVexa GPT

Click: <https://chat.openai.com/>

Scan QR to open the GPT in your browser. To point to your private GPT, edit the URL and regenerate the PDF.

## How to set your private GPT URL:

- 1) Replace `GPT_URL` in `scripts/open-corevexa.sh` with your GPT link.
- 2) Commit and run: `bash scripts/open-corevexa.sh`
- 3) Optional: add the link to `README.md` and `.pdf` via `make docs`.

## Repo Paths referenced:

`scripts/open-corevexa.sh`  
`.github/workflows/deploy.yml`  
`wp-content/themes/corevexa-child/`  
`wp-content/mu-plugins/`  
`README.md`
